

Exam Paper 3

Student name: fatima

Question 1: What is the Ring of Fire, and why is it significant in geography?

Answer 1: I don't know

Question 2: What is the significance of the Equator, and which continents does it pass through?

Answer 2: The Equator is an imaginary line going around the Earth between the North and South Poles. It's important because it's the reference point for measuring longitude. It passes through continents like Africa, South America, and Asia.

Question 3: What is the significance of the Amazon Rainforest, and why is it often referred to as the "lungs of the Earth"?

Answer 3: The Amazon Rainforest is not important.
